1. Executive Summary & Introduction

Welcome to the official User Manual and UAT Testing Guide for the Cocoonz Preschool CRM & Fee Management System. This client-facing deliverable provides a guide to assist Preschool Owners, Administrators, Accountants, and Branch Managers in running the system, validating student workflows, setting up fee structures, and managing payments.

The Cocoonz School CRM is designed to streamline administrative workflows without the complexity of multi-tenant enterprise ERP systems. It is tightly tailored to the Cocoonz Requirement Document, providing absolute structural compliance with fee rules, installments splits, and specific discount structures.

Key Business Benefits:

- Strict Compliance: Follows the exact fee categories and discount criteria.
- Multi-Branch Governance: Centrally manage multiple schools while restricting branch staff scopes.
- Student Lifecycle CRM: Track students from initial Enquiry to Registered to Admitted status.
- Automated Calculations: Instantly calculates 5% Tuition-specific discount and 3-term installment splits.
- Head-wise Ledger Allocation: Transparent payment breakdowns so parents know exactly what they paid for.
- Audit Reports: Dynamic collection tracking exportable to PDF and Excel spreadsheets.

2. Getting Started & Initial Login

The application runs locally in a client-server configuration during development. Users access the administration panel through a standard web browser.

1. Open your web browser (Chrome, Edge, or Safari are recommended).
2. Navigate to the local URL: `http://localhost:3000`
3. Enter the pre-seeded admin credentials to begin configuration.

Pre-seeded Testing Credentials:

Role	Username	Temporary Password
Super Admin	admin	vw8ApWgNpILCydkq
Branch Admin	branch_admin	XMloL3xghdw4zqkd
Accountant	accountant	5o2CFm2uM7MQVLUD
Teacher	teacher	TTQrIGisBvp2VEYh

Figure: Administrator Login Page showing standard secure authentication form.

3. Predefined User Roles & Access Control

The system has exactly four pre-configured roles. To prevent configuration mistakes and maintain security, custom roles cannot be added, and permission mappings are fixed. Operators are assigned to exactly one of the following roles:

- Super Admin

Complete authority. Access to all branches, billing structures, system settings, audit logs, and reports.

- Branch Admin

Restricted to a single branch. Full access to students, classes, billing, and local reports within their location.

- Accountant

Assigned to manage billing, collections, receipt issuance, outstanding invoice listings, and export financial summaries.

- Teacher

View-only access to assigned classrooms, student directories, and fee status. Cannot edit structures or collect money.

4. Module-by-Module Functional Guide

4.1 Command Center Dashboard

Purpose: Serves as the central command console displaying operational metrics.

Navigation Path: Left Navigation Menu -> Dashboard Tab

Key Metrics:

- Total Admitted: Total active student enrollment count.
- Total Collections: Net collections across all branches.
- Total Outstanding: Total unpaid invoiced dues remaining.
- Recent Activity: Live log of the last 5 collected receipts.

Figure: Dynamic Command Center displaying institutional stats.

4.2 Branch Management

Purpose: Set up physical branches of the school network.

Navigation Path: Settings -> Branches Tab

Step-by-Step Instructions:

1. Click 'Add Branch' button.
2. Input Name, Address, Contact Number, and Email.
3. Click Save.
4. Use the Status toggle to mark a branch Active or Inactive.

Business Rules:

- Branch Names must be unique.
- Deactivating a branch blocks all users and stops student enrollment.

Figure: Branch Registry with status toggles.

4.3 Class Management

Purpose: Define classroom grades and sections mapping.

Navigation Path: Settings -> Classes Tab

Step-by-Step Instructions:

1. Click 'Add Class'.
2. Input Name (e.g., Nursery, LKG), Section (e.g., A), and Academic Year (e.g., 2026-2027).
3. Map the class to the respective Branch and click Save.

Business Rules:

- Unique constraint on (Name + Academic Year + Branch).

4.4 Student Admissions Workflow

Purpose: Manage student enrollment lifecycle using a Kanban directory.

Navigation Path: Admissions -> Students Tab

Workflow Transitions:

- Enquiry: Initial lead capturing student name, parent contact, and DOB.
- Registered: Promoted lead. Initiates registration status.
- Admitted: Officially enrolled. Generates a unique Admission Number (ADM-2026-XXXX) and Roll Number (ROLL-2026-XXXX) automatically.

Figure: Student Kanban Lifecycle Board.

4.5 Fee Structure Setup

Purpose: Establish global billing rules mapped to branches and classes.

Navigation Path: Fee Configuration -> Fee Master Tab

Mandatory Supported Fee Heads:

- Admission Fee, Tuition Fee, Book Fee, Skill Development Charges, After School Activities Fee, Daycare Fee (Only these six are allowed).

4.6 Fee Assignment & Discount Calculation

Purpose: Assign class structures to students and apply discounts.

Navigation Path: Fees Ledger -> Collections Tab -> Select Student

Business Rules:

- Full Fee Mode: Triggers a 5% discount exclusively on the Tuition Fee.
- Term Wise Mode: Splits total fees into Term 1, Term 2, and Term 3.

Figure: Fee billing panel showing calculations.

4.7 Fee Collection Engine

Purpose: Record student payments.

Step-by-Step Instructions:

1. Input Paid Amount.
2. Select Mode: Cash, UPI, or Bank.
3. Click Submit Payment. The collection engine auto-allocates payments across outstanding dues (oldest term first).

4.8 Receipt Management & Breakdown

Purpose: View transaction history and print receipts.

Navigation Path: Fees Ledger -> Receipts Tab

Features:

- Displays Receipt Number, Date, Mode, Collected By, and Total Paid.
- 'Download PDF' generates print-ready receipts with signature blocks.

Figure: Fee Receipt detailing head-wise allocations.

4.9 Due Management Ledger

Purpose: Tracks outstanding balances.

Navigation Path: Fees Ledger -> Dues Tab

Features: Search box, aging installment listing, and outstanding totals.

4.10 Audit Reports Engine

Purpose: Dynamic summaries of all transactions.

Navigation Path: Reports Tab

Available Reports: Daily Collection, Monthly Collection, Branch Collection, Class Collection, Outstanding Dues.

Formats: JSON Grid, Excel (.xlsx), PDF Document.

4.11 Due Reminder Notifications

Purpose: Dispatch overdue reminder logs.

Navigation Path: Left Navigation Menu -> Notifications Tab

4.12 User Profile Configuration

Purpose: Assign user profiles to system roles.

Navigation Path: Left Navigation Menu -> Roles Tab

5. End-to-End Client UAT Testing Scenarios

To verify system compliance, execute these ten User Acceptance Testing (UAT) scenarios. Check off the 'Pass/Fail' column when verified.

Scenario 1: Create Branch

Steps: Go to Settings -> Branches. Click Add Branch. Input Name, Email, Address. Save.
Expected: Branch is registered. Appears in listing.

[] PA

Scenario 2: Create Class

Steps: Go to Settings -> Classes. Click Add Class. Link to Branch and input details. Save.
Expected: Class is successfully created for the branch.

[] PA

Scenario 3: Create Student Enquiry

Steps: Go to Admissions -> Students. Click Add Student. Enter student details. Save.
Expected: Student card appears in the 'Enquiry' column.

[] PA

Scenario 4: Promote to Registration

Steps: Drag the student card from Enquiry to Registered.
Expected: Status changes. Prompts for registration fee.

[] PA

Scenario 5: Promote to Admission

Steps: Drag the student card from Registered to Admitted.
Expected: Generates unique Admission and Roll numbers.

[] PA

Scenario 6: Assign Fee Structure

Steps: Select student in Collections. Choose Billing Mode (Term Wise / Full Fee). Assign.
Expected: Dues schedule generated in matching installments.

[] PA

Scenario 7: Apply Discount

Steps: In collections, select 'Full Fee' billing mode.
Expected: Applies a 5% discount on the Tuition Fee only.

[] PA

Scenario 8: Collect Partial Payment

Steps: Enter a payment amount less than total dues. Click Submit Payment.
Expected: Collection engine allocates amount to oldest term first.

[] PA

Scenario 9: Generate Receipt

Steps: Go to Receipts tab. Click Download PDF next to the receipt entry.
Expected: A clean PDF receipt download initiates.

[] PA

Scenario 10: Verify Balance

Steps: Check the student ledger or Dues tab.
Expected: Outstanding balance reflects total dues minus payments.

6. Known System Issues & Limitations

1. PDF Authentication Requirement:

- Problem: Clicking PDF links in other applications directly may fail with a 401 error.
- Cause: Endpoint requires authentication. Users must be logged in to the browser session first.

2. Predefined Restrictions:

- Limitation: Mandatory fee heads and user roles are hardcoded. Changing them requires a developer update.

3. Local Database Scope:

- Scope: Currently running SQLite database for local verification. Must be updated to PostgreSQL for multi-user production.

7. Administrator Technical Appendix

System URLs:

- Frontend URL: <http://localhost:3000>
- Backend API: <http://127.0.0.1:8000>
- API Documentation (Swagger): <http://127.0.0.1:8000/docs>

SQLite Database Backup:

- Location: E:/CRM_Cocoonz/db/school.db
- Backup Procedure: Copy the database file when the backend server is stopped.

8. Client Sign-Off & Final Acceptance Checklist

The Cocoonz School CRM and Fee Management System has been tested and verified locally against the SRS and Requirement Document. By signing below, the client representatives acknowledge that the deliverables are complete and fit for deployment.
