

COCOONZ PRESCHOOL CRM

USER GUIDE & UAT TESTING MANUAL

Document Version:	v1.3-UAT
Release Date:	June 20, 2026
Prepared For:	Client Testing and Acceptance (UAT)
Prepared By:	Cocoonz Team

■ UAT RELEASE NOTICE

This release is provided exclusively for testing and validation purposes.
The system should be tested by authorized client personnel using the provided scenarios.

Implementation is NOT considered complete until:

1. Client testing is completed successfully.
2. Client validates and confirms all requirements are met.
3. Formal sign-off is received from the client's authorized project sponsor.

THIS IS A USER ACCEPTANCE TESTING (UAT) RELEASE. THE IMPLEMENTATION WILL BE CONSIDERED COMPLETE ONLY AFTER THE CLIENT TESTS ALL FEATURES AND PROVIDES FORMAL APPROVAL.

1. Cover Page & UAT Notice	Page 1
2. System Overview & Scope Boundaries	Page 3
3. Test User Credentials	Page 3
4. Role Permissions Matrix	Page 4
5. Login & Session Guide	Page 4
6. Feature Walkthroughs & User Instructions	Page 5
7. Class Master Structure & Enforcements (CR-001)	Page 8
8. UAT Testing Scenarios & Scripts	Page 9
9. Formal Client Sign-Off Sheet	Page 11
10. Final Project Release Notice	Page 12

2. SYSTEM OVERVIEW & SCOPE BOUNDARIES

The Cocoonz Preschool CRM is designed to streamline administrative tasks, student enrollment tracking, staff records management, and fee collection processes. This system provides a centralised hub for branch operations, roles, and automated notifications.

In-Scope Modules (Ready for Client UAT):

- **Dashboard:** Centralised KPI metrics showing financial status, attendance rates, and student enrollments.
- **Branch Management:** Configuring multiple branch offices, physical address locations, and contact details.
- **Class Management:** Setting up class groups, academic years, sections, and division classifications.
- **Student Management:** Directory lists, adding profiles, updating student records, and deleting profiles.
- **Fee Structures:** Configuring structures for Tuition Fees, Admission Fees, etc. by academic year and branch.
- **Fee Assignment:** Attaching structure fees to students and executing automatic billing.
- **Collections:** Processing student partial or full payments and updating ledger tables.
- **Receipt History:** Storing receipt breakdowns and generated transaction codes.
- **Due Management:** Scanning outstanding ledger dues and generating reminder lists.
- **Audit Reports:** Generating Excel/PDF transaction lists and system activity logs.
- **Notifications:** Sending custom messages to communication channels (mocked SMS and WhatsApp).
- **Roles & Users:** Creating user logins and granting permissions based on roles.

Out-of-Scope Modules (Excluded from current UAT release):

- Attendance Tracking & Bulk Posting
- Staff Payroll & Salary Management
- Inventory & Asset Management
- School Transport & Vehicle Trips Tracking
- Parent Mobile Application interface
- LMS (Learning Management System) features

3. TEST USER CREDENTIALS

Please use the following login credentials to evaluate permissions and workflows during the UAT testing phase.

Role	Username	Password	Purpose / Access Scope
------	----------	----------	------------------------

Super Admin	admin	password123	Full configuration, system management, audit reports, user roles creation, and overrides.
Branch Admin	office_admin	password123	Branch level operations, student management, admissions, and collections.
Accountant	accountant_user	password123	Fee structure creation, collection recording, ledger postings, and receipt generation.
Teacher	teacher_user	password123	View dashboard, search students, run attendance, read-only structures.

Note: These credentials are for testing purposes only and will be changed before production deployment.

4. ROLE PERMISSIONS MATRIX

The matrix below outlines active endpoints and frontend page access levels configured for each role group.

Module	Super Admin	Branch Admin	Accountant	Teacher
Dashboard Views	Full Access	Full Access	Full Access	Read-Only
Branch Config	Read / Write	No Access	No Access	No Access
Class Creation	Read / Write	Read / Write	No Access	No Access
Student Records	Full Access	Full Access	Read-Only	Read-Only
Fee Structures	Full Access	Read-Only	Full Access	Read-Only
Collect Payments	Yes	Yes	Yes	No
General Ledger	Yes	No	Yes	No
Audit Reports	Yes	No	No	No
Users Management	Full Access	No Access	No Access	No Access

5. LOGIN & SESSION GUIDE

System URL: http://localhost:3000 (Frontend Next.js) or http://localhost:8000/frontend/ (Legacy client view)

Login Steps:

1. Open browser and type in the System URL.
2. The browser automatically presents the authentication prompt.
3. Enter test credentials (e.g. Username: admin, Password: password123).
4. Click **Login**.

Expected Result: Authentication token is saved in cookie/local storage. Browser redirects the user to the active Command Center dashboard showing active modules.

Figure 1: Desktop Login Interface showing secure credential verification screen.

Logout Steps: Click the **Logout** button on the top header. Token cookies are cleared from browser session and user redirects back to the Login prompt.

6. FEATURE WALKTHROUGHS & USER INSTRUCTIONS

This section contains walkthrough instructions and validation guidelines for the principal administrative modules.

6.1 Command Center Dashboard

- **Purpose:** Displays real-time aggregated metrics including student enrollment counts, financial liquidity, and attendance status.
- **Navigation:** System home route redirect (/admin or admin.html).
- **Expected Result:** Dashboard loads without console errors. Cards reflect real-time counts synced with backend database.

Figure 2: Unified Command Center dashboard with operational metrics.

6.2 Branch Management

- **Purpose:** Set up separate preschool branches.
- **Navigation:** Sidebar Link -> Branch Management.
- **Step-by-step:** Click 'Add Branch', enter name, address, contact phone, and email address, and click save.
- **Validation Rules:** Name, address, and email are required. Contact number must match phone formats (+91...). Duplicate branch names are rejected.

Figure 3: Branch setup configuration listing active branch offices.

6.3 Class Management

- **Purpose:** Setup sections and align class names to divisions.
- **Navigation:** Sidebar Link -> Class Config.
- **Step-by-step:** Select Division (Preschool / Primary), enter name (e.g. Playgroup), section (e.g. A), and save.
- **Validation Rules:** Under FIXED mode, class name must belong to whitelisted preschool/primary lists (rejected otherwise). Section name cannot be blank. Combination of Class Name + Section + Branch + Academic Year must be unique.

Figure 4: Standardised dropdown grouping classes by Division using optgroup elements.

6.4 Student Management

- **Purpose:** Register profiles and manage details.
- **Navigation:** Modules Grid -> Students.
- **Expected Result:** Displays searchable datatable of all students registered. Includes options to admit new student, update record, or delete profile.

Figure 5: Modern Student directory dashboard interface.

6.5 Fee Structures

- **Purpose:** Standardise billing charges by branch and class.
- **Validation Rules:** Charges cannot be negative. Must specify class, academic year, and branch.

6.6 Fee Assignment & Payment Collection

- **Purpose:** Assign fees to students and record collections.
- **Navigation:** Sidebar Link -> Collect Fees / Assign Dues.
- **Expected Result:** Displays student's ledger outline. Allows executing partial payment which instantly updates the outstanding balance.

Figure 6: Interactive student billing panel and partial payment console.

6.7 Receipt History

- **Purpose:** Track receipt codes and payment logs.
- **Expected Result:** Select receipt to view a formatted transaction log detailing date, mode of pay, and amount.

Figure 7: Receipt generation showing transaction details and print layouts.

6.8 Due Management: Outstanding Ledger Dues list.

6.9 Audit Reports: Generate transaction logs in Excel/PDF.

6.10 Notifications: Automated reminders sent to communication channel queues.

6.11 Roles & Users: Configure portal logins and permissions.

7. CLASS MASTER STRUCTURE & ENFORCEMENTS (CR-001)

Under the whitelisting restrictions of **CR-001**, class management behaves as follows:

Whitelisted Class Names:

- **Preschool Division:** Playgroup, Readiness, Pre KG, Junior KG, Senior KG
- **Primary Division:** Class 1, Class 2, Class 3, Class 4, Class 5

Behavioral Modes (CLASS_MASTER_MODE in .env):

1. **FIXED Mode:** Setting CLASS_MASTER_MODE=FIXED. The system enforces strict validation. Creating classes outside the whitelists (e.g. Montessori, Toddler) returns a 400 Bad Request error. Division classifications ('Preschool' / 'Primary') are mapped and set automatically.
2. **CONFIGURABLE Mode:** Setting CLASS_MASTER_MODE=CONFIGURABLE. Custom class names are allowed, and divisions can be explicitly configured.

Preservation Policy:

Historical classes (such as LKG, UKG, 1st Std, 2nd Std created before CR-001 implementation) are fully preserved in the database. Existing student assignments, fee invoices, receipts, and collections linked to these legacy classes remain intact and unaffected.

8. UAT TESTING SCENARIOS & SCRIPTS

Perform the following scenario runs during UAT. Record status on the Sign-Off sheet.

ID	Description	Steps	Expected Outcome	Pass/Fail
TC-001	Secure Login Validation	Submit invalid username/password to login.	System rejects request, returning HTTP 401 Unauthorized.	[]
TC-002	Create Class: Playgroup (FIXED)	Set Mode=FIXED. Try to create class 'Playgroup'.	Success (HTTP 200). Division auto-saved as 'Preschool'.	[]
TC-003	Create Class: Class 5 (FIXED)	Set Mode=FIXED. Try to create class 'Class 5'.	Success (HTTP 200). Division auto-saved as 'Primary'.	[]
TC-004	Reject Invalid Class Name	Set Mode=FIXED. Try to create 'Montessori' or 'Toddler'.	Rejected (HTTP 400 Bad Request) with error message whitelisting validation.	[]
TC-005	CONFIGURABLE Custom Class	Set Mode=CONFIGURABLE. Try to create 'Montessori'.	Success (HTTP 200). Custom class name is allowed.	[]
TC-006	Admit Student Profile	Create student Arjun, assign class Playgroup, total fees 30000.	Success (HTTP 200). Student profile created and fee summary added.	[]
TC-007	Record Partial Payment & Receipt	Post payment of 10000 for Arjun. Check transaction.	Success (HTTP 200). Balances update to paid=10000, pending=20000. Receipt code REC-TEST-999 issued.	[]
TC-008	Ledger Auto-Posting	Check GeneralLedger table for recorded payment of 10000.	Success. Income fee transaction matching payment ID is logged.	[]
TC-009	Role Access: Accountant Access	Login as Accountant. Try to create user.	Access Denied (HTTP 403 Forbidden). Restricted to Admins.	[]

9. FORMAL CLIENT SIGN-OFF SHEET

THIS IS A USER ACCEPTANCE TESTING (UAT) RELEASE. THE IMPLEMENTATION WILL BE CONSIDERED COMPLETE ONLY AFTER THE CLIENT TESTS ALL FEATURES AND PROVIDES FORMAL APPROVAL.

Project Title:	Cocoonz Preschool CRM Integration
UAT Version:	Release v1.3-UAT (Ready for Client UAT)
Client Org Name:	_____
Tester Name & Title:	_____
UAT Testing Period:	_____
Tester Review Comments:	_____ _____ _____ _____
UAT Final Approval Status:	☐ Approved & Ready for Production ☐ Approved with Minor Core Adjustments ☐ Requires Fixes & Re-Testing ☐ Rejected
Authorized Signature:	_____
Sign-Off Date:	_____

10. FINAL PROJECT RELEASE NOTICE

IMPORTANT DEVELOPMENT STATUS DECLARATION

This project is **NOT** considered completed based on internal development testing alone.

Full production completion will be recognized only after the client organization completes UAT, validates the business workflows, and confirms requirements are satisfied by signing the UAT Approval Sheet.

Any issues, exceptions, or feedback identified during the testing phase will be logged and resolved before project closure.

STATUS: Ready for Client UAT
